

Delineating the Public Use Microdata Areas for the 2020 Census

Regional GIS Meeting
NCTCOG
May 17, 2022

Po-Chun Huang, Ph.D.
Special Research Associate
IDSER/TDC at UTSA
Po-Chun.Huang@utsa.edu

Scope of the presentation

Public Use Microdata Areas (PUMA) 101

What are Public Use Microdata Areas (PUMAs)?

PUMA

- What?
 - **Non-overlapping**, statistical geographic areas that partition each state or equivalent entity into geographic areas containing **no fewer than 100,000 people**.
- When?
 - Defined **every ten years**
- Who?
 - **State Data Centers (SDCs)** are primary participants for PUMA delineation.
 - Local inputs from stakeholders are encouraged
- Why?
 - For the tabulation and dissemination of the decennial census and American Community Survey (ACS) Public Use Microdata Sample **(PUMS) data**.

When do we utilize the ACS PUMS file?

Table. Sex of Workers (16+ years old) by Vehicles Available

	Tarrant County
Total:	1,018,656
No vehicle available	16,310
1 vehicle available	185,466
2 vehicles available	449,541
3 vehicles available	228,033
4 vehicles available	99,858
5 or more vehicles available	39,448
Male:	548,505
No vehicle available	8,389
1 vehicle available	86,120
2 vehicles available	246,966
3 vehicles available	127,334
4 vehicles available	56,418
5 or more vehicles available	23,278
Female:	470,151
No vehicle available	7,921
1 vehicle available	99,346
2 vehicles available	202,575
3 vehicles available	100,699
4 vehicles available	43,440
5 or more vehicles available	16,170

- What if we also need to consider another factor, such as age?
 - Census Bureau does not pre-tabulate worker's vehicle availability by sex AND age.
 - Need to customize the tabulation using an individual level ACS sample data (along with the sample weights)

The ACS PUMS file

- Fully customizable individual data versus data confidentiality
 - ACS data provide many variables/attributes
 - For geographies with relatively few people, attackers can identify individual's detail information by cross-referencing all the attributes
- To protect ACS survey respondents' confidentiality
 - The required population size to insure confidentiality is 100,000+ people
 - The closest available existing geography with that population size would be: county (and its equivalency)
 - However, many counties do not have a population of 100,000+
 - Census Bureau needs to "create" a specific type of geography for the PUMS file, which are the PUMAs

PUMAs - examples

1. Single county with multiple PUMAs
(counties with a large population)

PUMA 02501: Tarrant County (Northeast)--Grapevine, Southlake & Colleyville Cities

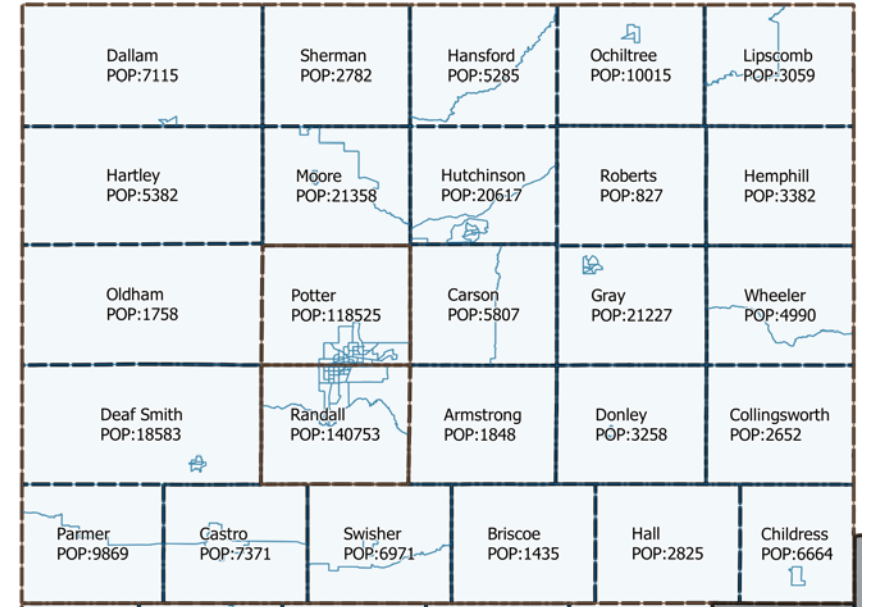

·
·
·
PUMA 02516: Tarrant County (Northwest)--Fort Worth (Northwest) & Saginaw Cities

2. Single county in a single PUMA

PUMA 01400: Kaufman County

3. Multiple counties in a single PUMA
(counties with a small population)

PUMA 00100: Panhandle Regional Planning Commission
(Outside Potter & Randall Counties)

-  Census Tract (2020)
-  County
-  PUMA (2020)

2020 PUMA
delineation process

Criteria for PUMAs

- 1 Minimum population of 100,000 people (hard threshold)
- 2 Consider splitting PUMAs of 200,000+ people (soft threshold)
- 3 PUMAs do not cross state boundaries
- 4 The smallest unit for PUMA development is Census Tract
- 5 PUMAs should be geographically contiguous
- 6 85 character maximum length for PUMA names

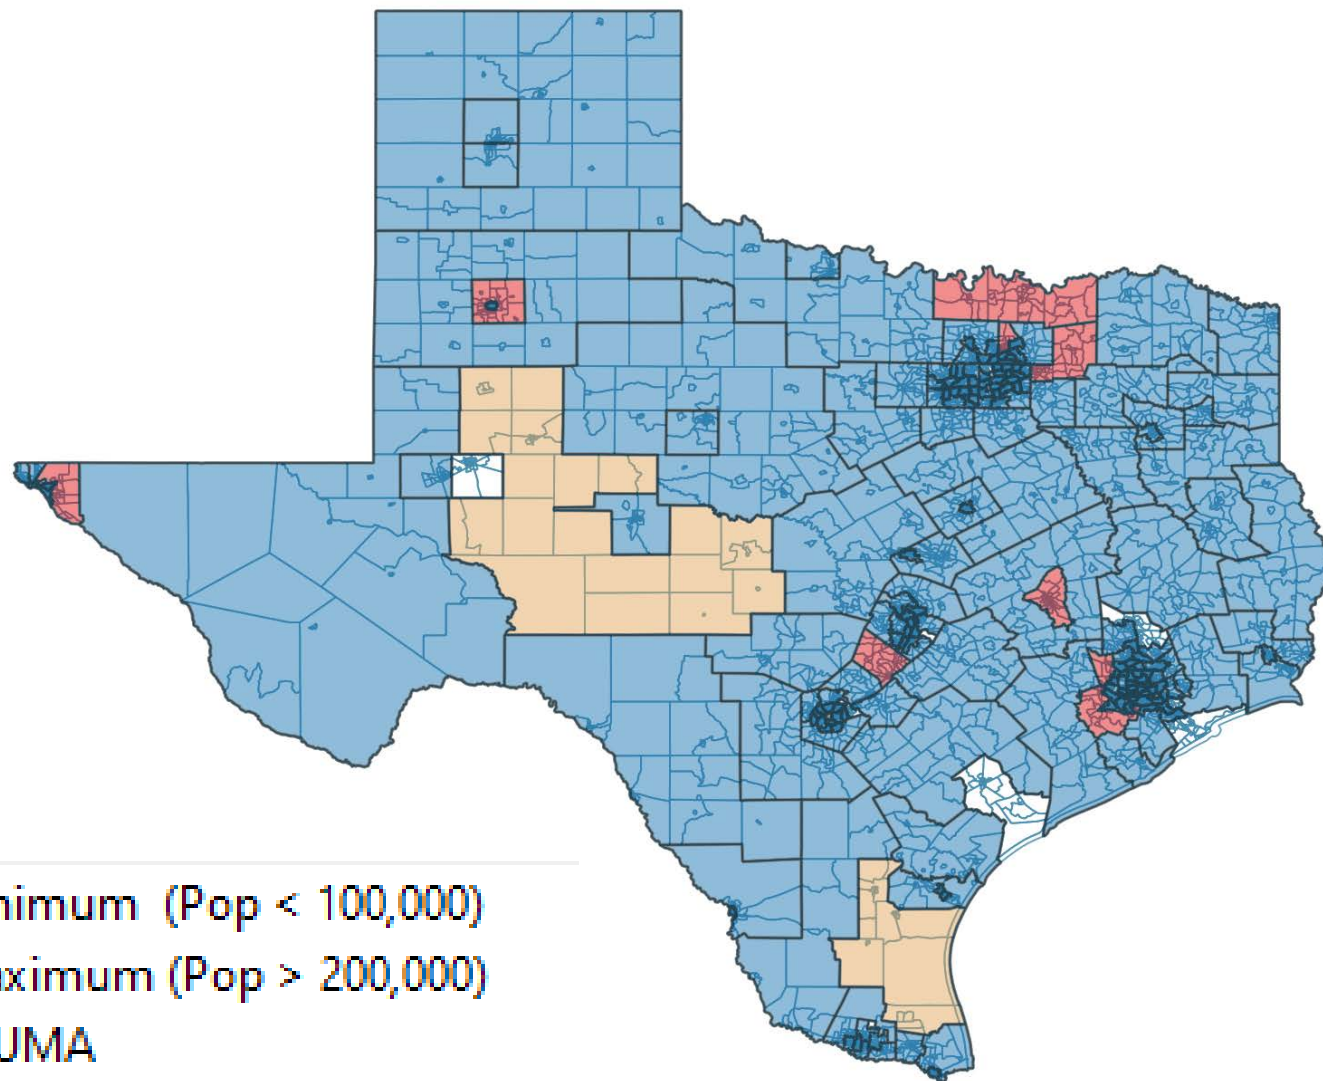

Platform and tools for the PUMA delineation

- Platform:
 - QGIS (v 3.4.4)
 - Geographic Update Partnership Software (GUPS), an add-on app
- Tools
 - Texas 2010 PUMA boundaries layer
 - Census Tract total population (2020 counts) is provided in GUPS
 - Data spreadsheet with population trend analysis and extrapolated to 2030
 - Census Block Group layer with population change info between 2010-2019
 - Texas Council of Government (COG) boundary layer
 - Esri Street map imagery

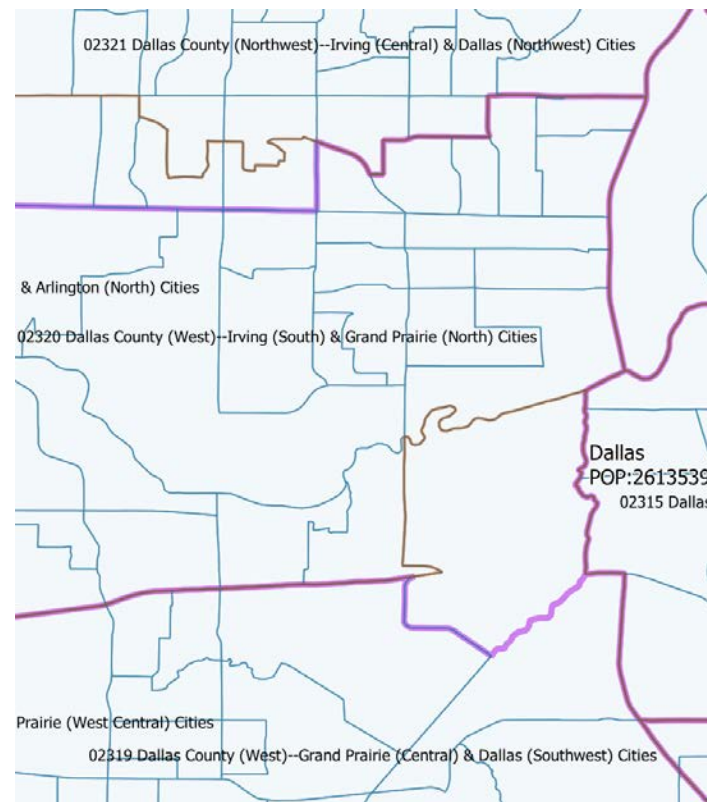

PUMA delineation process – step 1

- Inserted the Texas 2010 PUMA boundaries layer to QGIS
- GUPS highlights PUMAs (based on 2020 population counts) in three types
- The Blank/White polygons are Census Tracts with boundary changes in 2020

Step 2 – Addressed Census Tracts with boundaries changes in 2020

-  Census Tract (2020)
-  PUMA (2010)
-  PUMA (2020)
-  County

Step 3 – Locate PUMAs that need to be modified

- GUPS highlights PUMAs
 - PUMAs with 200,000+ people (based on 2020 population counts)
 - PUMAs with < 100,000 people (based on 2020 population counts)
- Non-highlighted PUMAs but need to make sure their potential population changes (extrapolated trend) are taken into account for the decade of 2020-2030

Tools to inform the delineation decisions

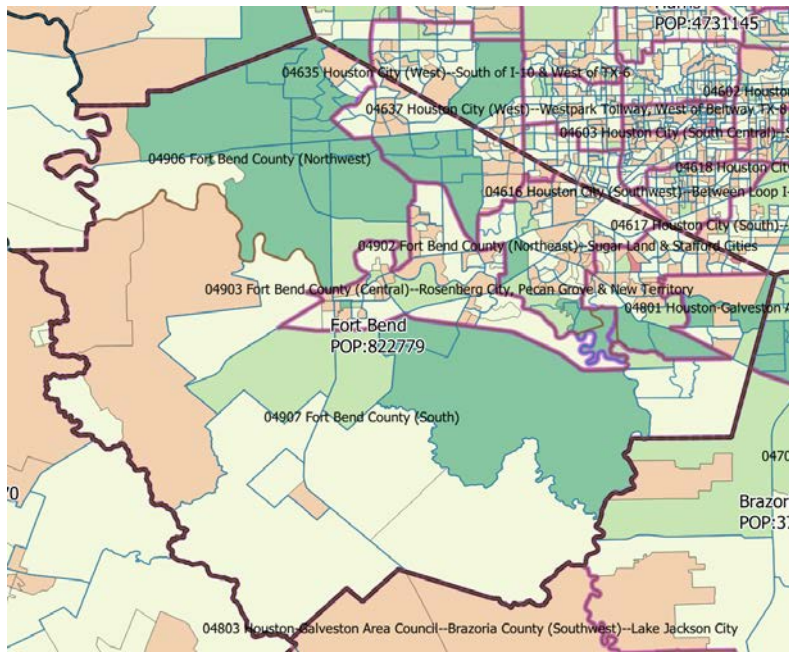

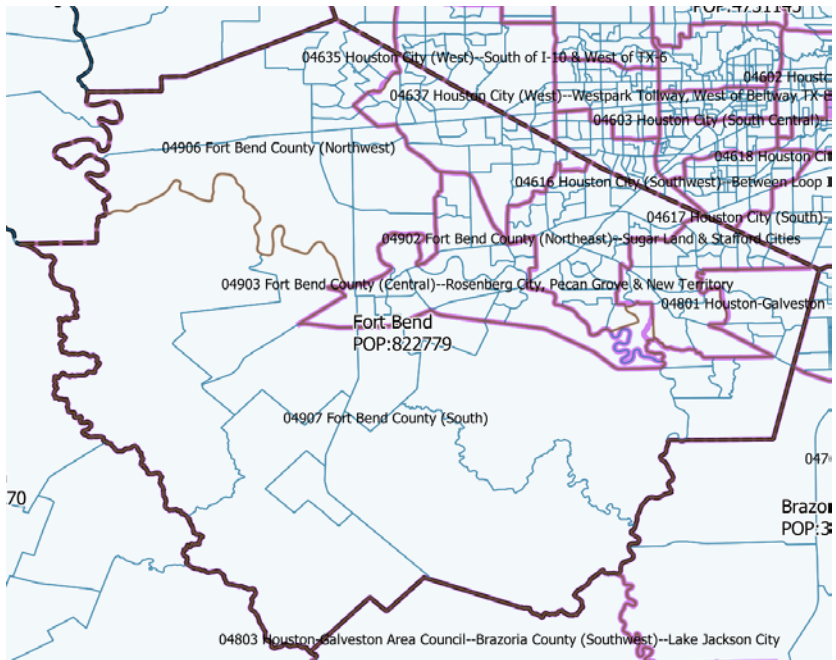

❖ Data Spreadsheet with Population trend analysis and extrapolated to 2030

Tools to inform the delineation decisions

❖ Census Block Group level layer with population change between 2010-2019

- Census Tract (2010)
- Census Tract (2020)
- PUMA (2010)
- PUMA (2020)
- County

- 100% - -50%
- 50% - 0%
- 0% - 50%
- 50% - 100%
- > 100%

- 3,455 - -999
- 999 - 0
- 0 - 1,000
- 1,001 - 5,000
- 5,001 - 38,305

Addressed PUMAs with 200,000+ people

PUMA 00501: South Plains Association of Governments--Lubbock County--Lubbock City (Central)

- **Solution: expanded the Lubbock City (Central) PUMA**

- Census Tract (2020)
- PUMA (2010)
- PUMA (2020)
- County

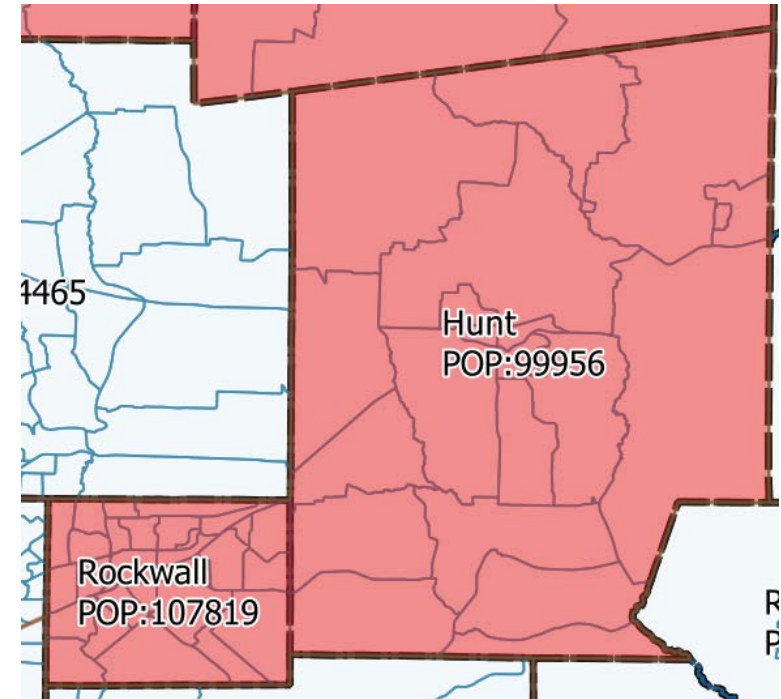

Addressed PUMAs with 200,000+ people

- Solution: maintained the historical PUMA boundaries (2010)

PUMA 00800: Texoma COG--Grayson, Cooke & Fannin Counties

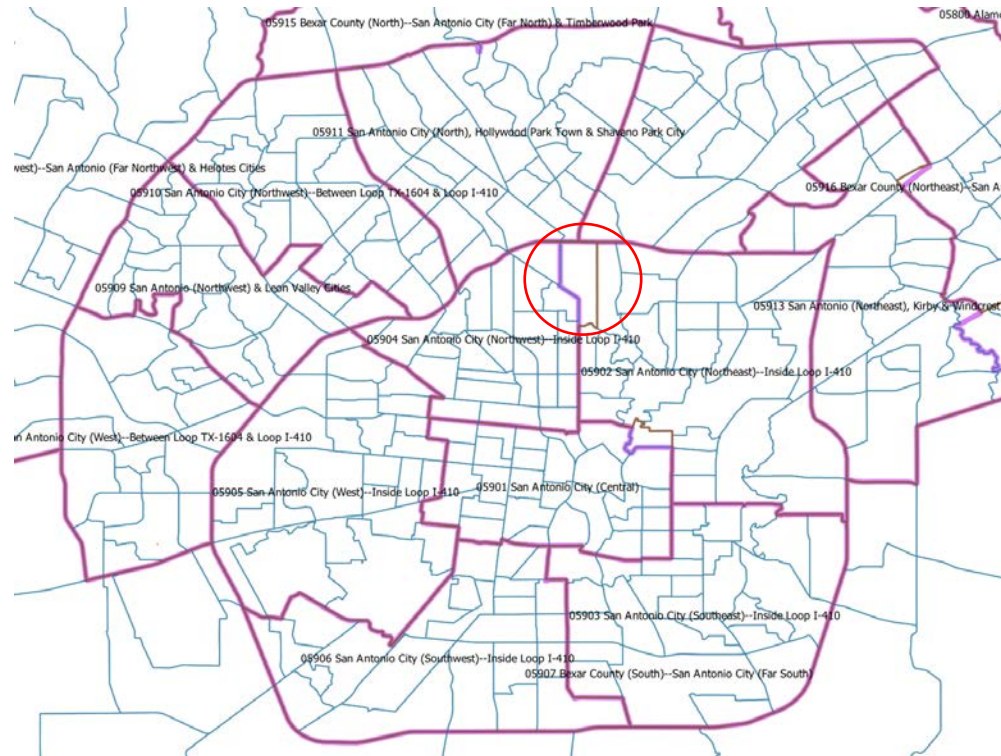

PUMA 00900: Hunt & Rockwall Counties--
Rockwall, Greenville & Dallas (Far Northeast) Cities

-  Census Tract (2020)
-  County
-  PUMA (2020)

Addressed PUMAs with <100,000 people

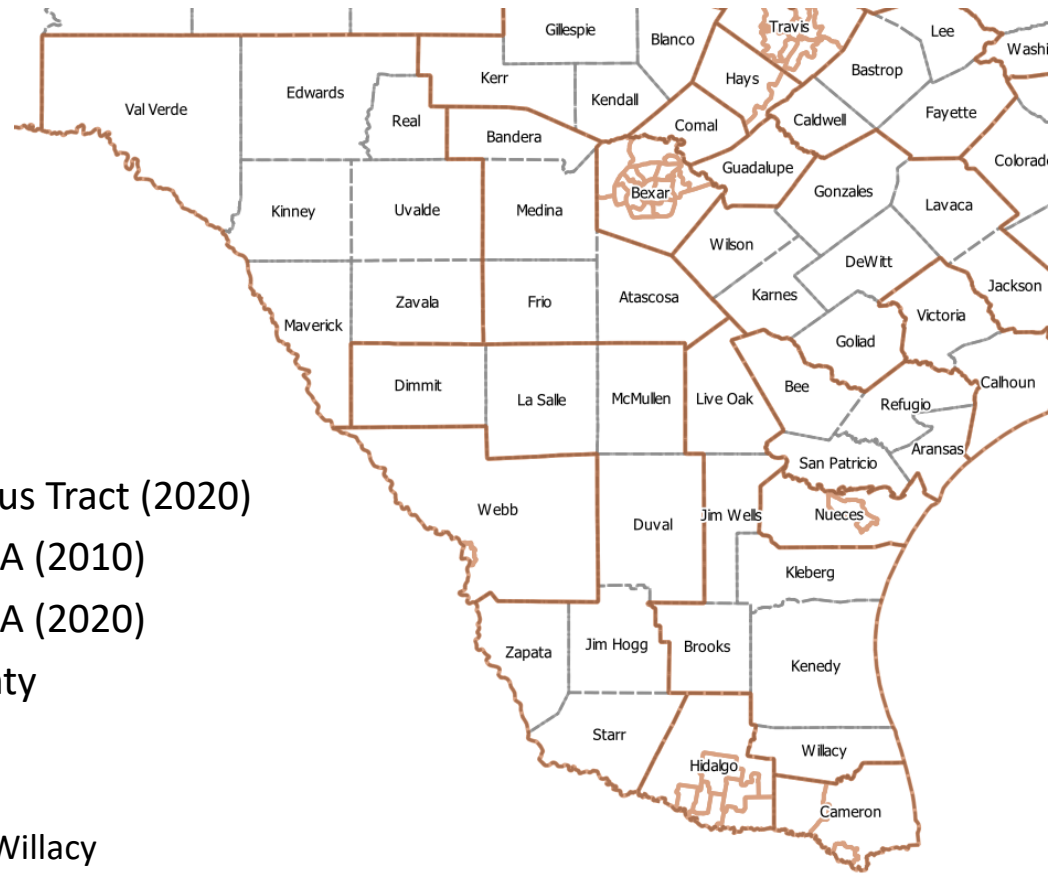

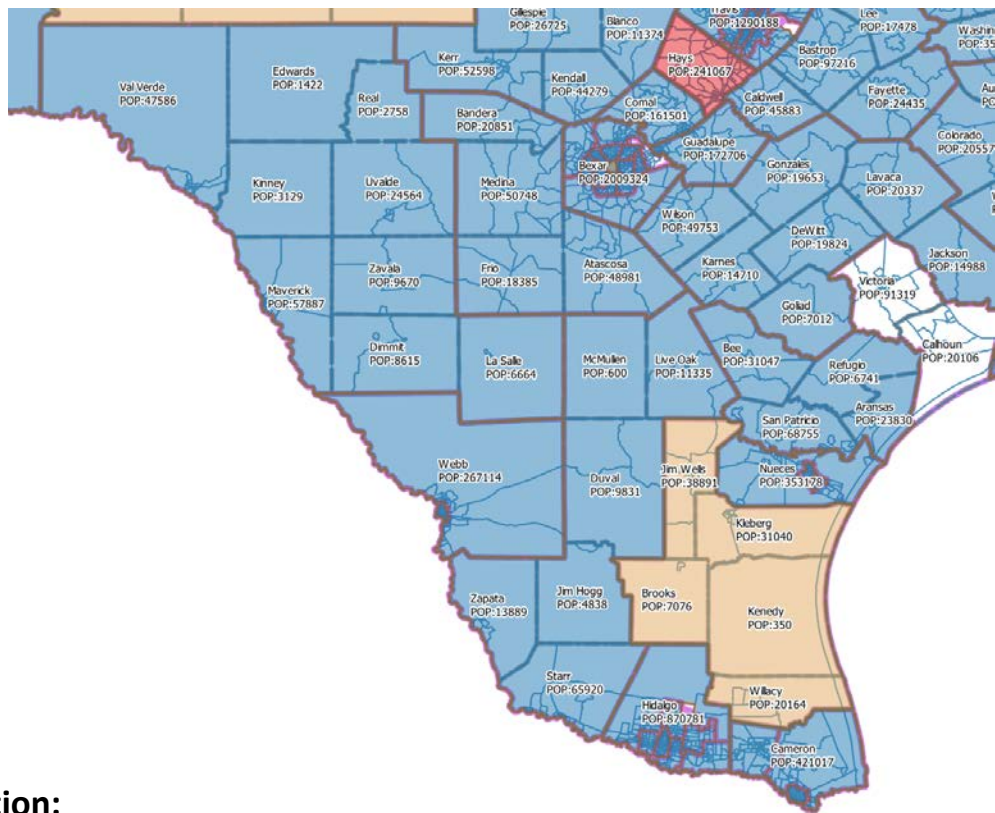

- Solution: expanded the San Antonio City (Northwest) – Inside Loop I-410 PUMA

- Census Tract (2020)
- PUMA (2010)
- PUMA (2020)
- County

A complex case to modify PUMAs < 100,000 people

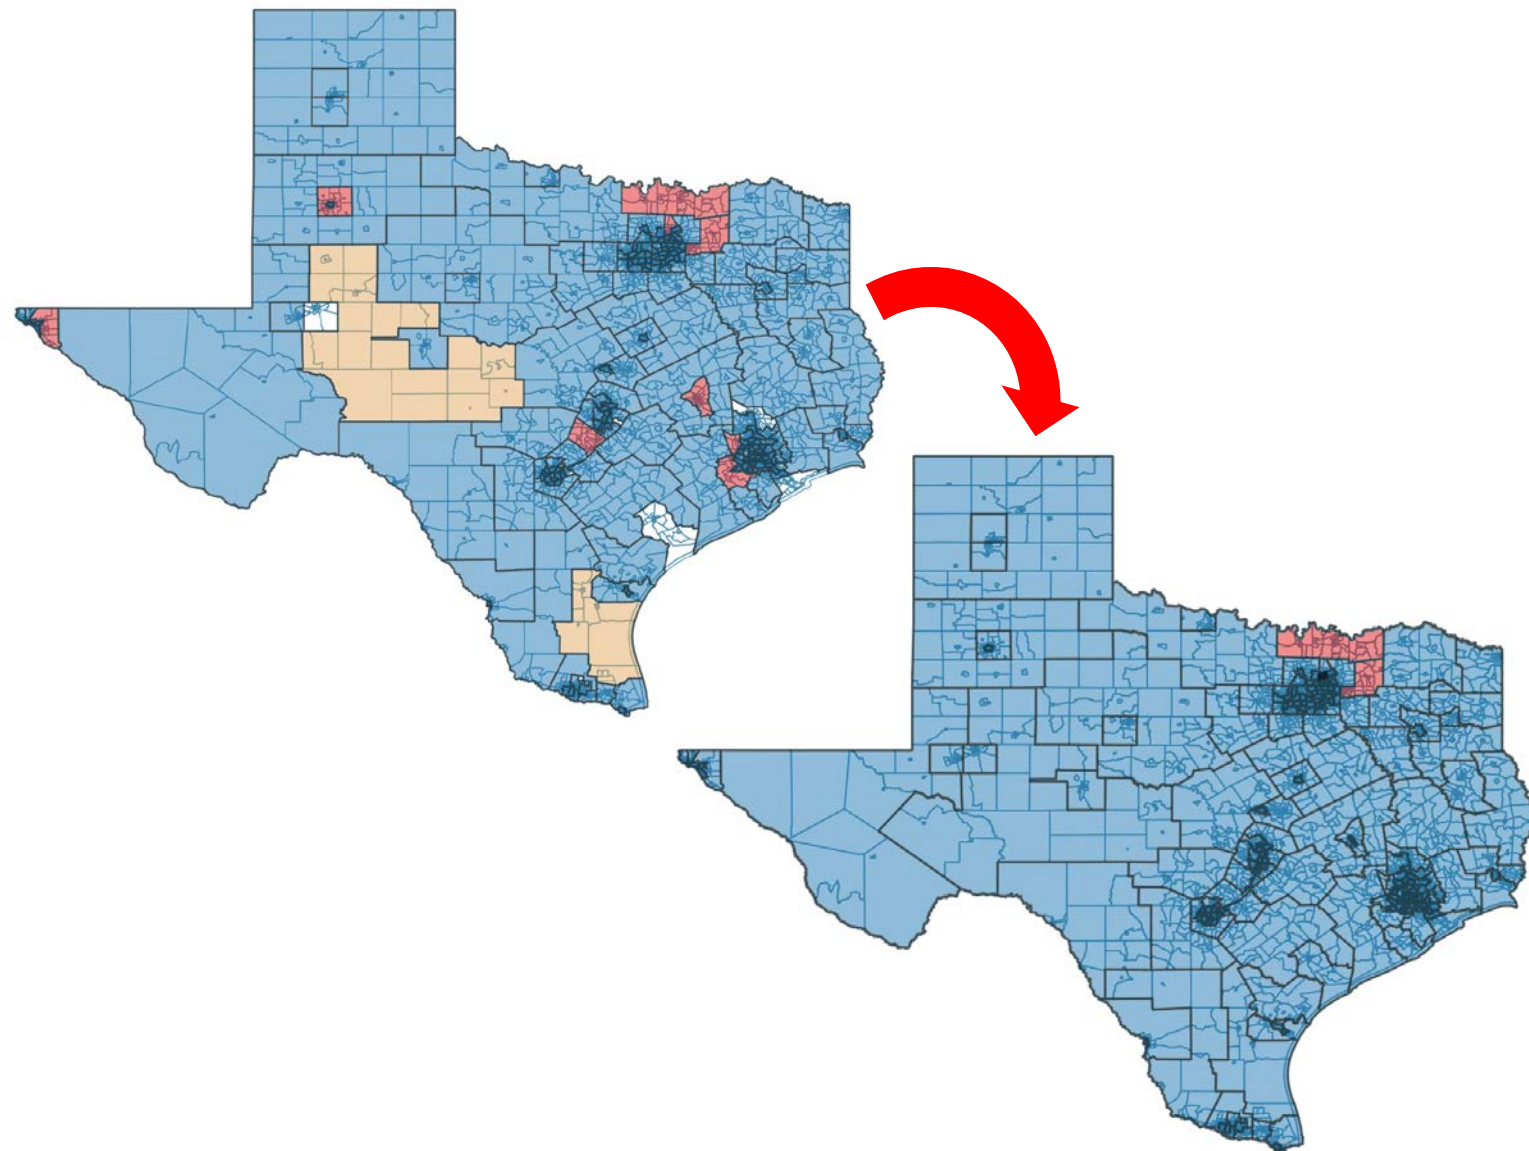

Solution:

1. **Added Live Oak County**, and PUMA name changed to Coastal Bend COG (Central) & Willacy County; PUMA number changed to 4807700
2. **Added La Salle and Dimmit Counties and removed Live Oak County**, and PUMA name changed to South Texas Development Council (South) & Coastal Bend COG (West) & Dimmit & La Salle; PUMA number changed to 4807600
3. **Remove La Salle and Dimmit Counties**, and PUMA name changed to Middle Rio Grande Development Council--Excluding Dimmit & La Salle Counties; PUMA number changed to 4807500

Texas 2020 PUMAs – final results

- 212 PUMAs
 - 16 Census Tract boundary change cases
 - 5 PUMAs were expanded to include more population
 - 7 out of the 9 PUMAs with 200,000+ people were split into two new PUMAs
- Texas 2020 PUMA delineation was submitted to Census Bureau on 1/31/2022

A large, stylized graphic of a five-pointed star. The star is filled with a gold color and has a thick, dark blue outline. The star is positioned on the left side of the page, with its points extending towards the right. The background behind the star is a solid dark blue.
