Lucille Johnson, Assistant to the Executive Director, discussed the status of the North Central Texas Economic Development District (NCTEDD) Board. She explained that she had received requests for NCTEDD Board membership from member cities in the smaller population categories defined by the Bylaws. She explained the number of cities within each designated population category defined by the bylaws and discussed and compared the representation for cities in the small population categories versus the representation for cities in the large population categories. As an example, she pointed out that there are two Board positions available from among the 122 cities in the population category of cities under 25,000; and, also two Board positions available from among the only three cities in the population category of between 200,000-350,00. She told the Board that at the January 5, 2018 meeting of the NCTEDD Board, the members discussed the need to make provisions in the Bylaws to increase the representation/seats for small cities — i.e. the population categories that have large numbers of member cities, as well as in the private sector and principal economic interest categories. The NCTEDD Board will meet on April 27, 2018 and will discuss the seats and forward a recommendation to the NCTCOG Executive Board to authorize appropriate Bylaw changes to accommodate the needs and requests for membership in these categories.

Item 14 Status Report on 2018 Current Population Estimates

Tim Barbee, Director of Research & Information Services, introduced Brian Lister, the Senior Research Data Analyst, to discuss the 2018 Current Population Estimates and review the highlights of the North Central Texas region's annual population growth. The Population Estimates include totals for all cities in the region with over 1,000 in population, each county in the region, the twelve-county metropolitan planning area, and the region in total. Historical U.S. Census figures are also provided. He explained that local governments provided input as part of the estimation process and were given an opportunity to review draft numbers prior to finalization. NCTCOG's population estimates are often cited and are recognized for their coverage, timeliness, and uniqueness.

REGIONAL POPULATION CENTER & GEOGRAPHIC CENTER

Population Estimates

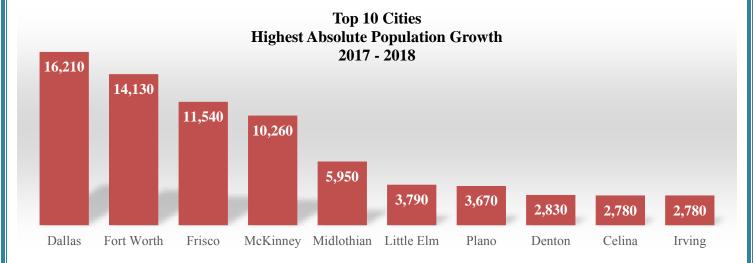

Population estimates are based on current housing inventories for cities in the NCTCOG Region with populations of 1,000 or more. Cities are listed in the county that contains the majority of the city's population.

Executive Summary

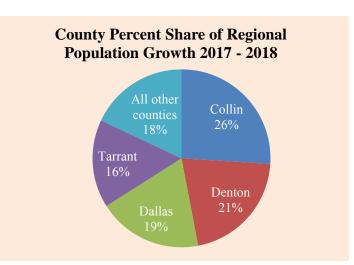

The estimated January 1, 2018 population for the NCTCOG region is 7,390,080. Last year, the region added 143,070 people. In 2017, 12 cities grew by more than 10%. The city of Dallas led the region in growth, adding 16,210 people last year while Fort Worth added 14,130, followed by Frisco with 11,540. Collin, Denton, Dallas, and Tarrant counties each added more than 20,000 people last year, accounting for 82% of the regional growth.

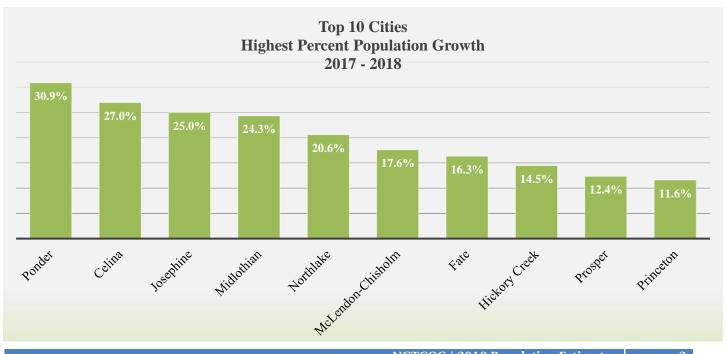

Residential construction continued to trend upward as more corporate relocations have continued to play a major role in the surge in growth. Since 2000, the region has grown by over 39%. More than 48,000 new residential units were completed in 2017 making last year the most active year for new residential construction since 2007. The city of Dallas led the way in residential units with more than 9,000 completions last year. More than 80% of these new units were multi-family. Dallas accounted for one third of all new multi-family units added to the region in 2017. Fort Worth had more than 6,000 residential completions. The top 10 cities in new construction accounted for 60% of all units built last year. The north central Texas region should continue to be one of the leading destinations for people looking to relocate to an area with a mild climate, relatively low cost of living, as well as a vibrant and diversified workforce.
