<b>Routine Roadside Emissions Inspections</b>	
Frequency	Random
Applies to	Current regulations for roadside inspections apply to HDVs 6,000+ GVWR, but typically HDVs 14,001 GVWR are targeted for roadside inspections. Diesel HDVs up to 14,000 lbs. and all gasoline HDVs are subject to California's Smog Check program, which is implemented by the Bureau of Automotive Repair.
Inspection Type	Visual/Tampering Opacity Emission Control Label Inspections
Opacity	
Visual/Tampering	The CARB staff may cite engine/vehicle owners for tampering under title 13, California Code of Regulations, section 2183 et seq. Tampering can include both physical engine and emissions controls systems and electronic tampering (e.g. changing the rated engine HP from the factory specified and certified level). Additionally, the CARB staff may cite owners of on-road commercial heavy-duty diesel powered vehicles using off road heavy-duty diesel engines.
Special Equipment Used	Smoke meters meeting SAE J1667 specifications
Performing Agency	CARB

Training Required	A specially trained subset of officers perform the I/M-related inspections
Penalties for Failing	Typically, \$300 - \$1,800 per violation. See penalty schedule by model year and level of citation in pamphlet linked below
